

SEMINAR SERIES

BROUGHT TO YOU BY ENVIRONMENT AND PLANNING DIRECTORATE & ENVIRONMENT INSTITUTE OF AUSTRALIA AND NEW ZEALAND

CONSERVING ACT HERITAGE

The ACT is rich in natural and cultural heritage. Although the city is relatively young, we have many heritage places and objects, including Aboriginal, historic, both urban and rural, and natural. There are many challenges facing the Government and industry in appropriately understanding and conserving our heritage. Please join us for a discussion on the challenges and possibilities they have faced in working to conserve our city's heritage.

This interactive seminar series showcases perspectives on a common sustainability issue. Held bi-monthly, you'll hear views from the ACT Government and from a private environment based expert. Each session will provide you with:

- innovative ideas
- targeted learning
- professional development
- networking

Environmental and other professionals across the ACT and surrounding region are encouraged to attend.
